Stand For Education Campaign

- The Alberta government is making dangerous changes to the public education curriculum—ignoring important lessons and overloading the curriculum with irrelevant information that isn't age-appropriate. Funding cuts mean fewer programs, less support and lost opportunities. Bigger class sizes are leaving teachers struggling to provide support to kids that need it most.

Parents and teachers across the province are joining together to stand up for children and their futures. **Take a stand with us—tell the government to put children first in our public education system.**
